

AMENDMENTS TO THE SPECIFICATION

Please delete the paragraph beginning on page 3, line 14 of the Specification as follows:

~~The conductive medium may be composed a metal coating set on the heat resistant radiating conductor or the ground conductor.~~

Please delete the paragraph beginning on page 3, line 17 of the Specification as follows:

~~Also in this case, when the metal coating is made of copper as a main component, soldering can suitably be functioned.~~

Please delete the paragraph beginning on page 8, line 10 of the Specification as follows:

~~The conductive medium (23) may be composed of a metallic coating of copper and the like set on the radiating conductor (11) or the ground conductor (12).~~

Please delete the paragraph beginning on page 8, line 13 of the Specification as follows:

~~Thus, cloth made of a heat resistant aramid fiber and the like, treated with a copper coating can be utilized as the radiating conductor (11) or the ground conductor (12) attached with the conductive medium (23).~~
